DETAILED ACTION

The response filed **5/23/07** presents remarks and arguments to the office action mailed **3/8/07**. Applicants' request for reconsideration of the rejection of claims in the last office action has been considered.

Applicants' arguments, filed, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The finality of the action has been withdrawn.

Status of Claims

Claims 16-35 are newly added. Applicant upon Restriction Requirement elected compound ST 2195 (methyl 2- [3-[2-(4- chlorophenyl)ethoxy]phenylthio]iso-butyrate) which is still under consideration.

Claim 23 is withdrawn as to a non-elected specie.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1614

Claims 19 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is a written description rejection.

Claim 19 recites " R is a heteroaryl containing nitrogen as heteroatom bound to the rest of the molecule via all the positions allowed" but the instant disclosure fail to describe anything directed to how the attachment is done via all possible position. This is not shown.

Applicant has not conveyed possession of the invention with reasonable clarity to one skilled in the art. In particular, Applicant has not provided a description of the structure of a representative number of derivative compounds nor a description of the chemical and/or physical characteristics of a representative number of compounds nor a description of how to obtain a representative number of specific compounds.

To satisfy the written description requirement, applicant must convey with reasonable clarity to one skilled in the art, as of the filing date that application was in possession of the claimed invention. A lack of adequate written description issue also arises if the knowledge and level of skill in the art would not permit one skilled in the art to immediately envisage the product claimed from the disclosed process. See, e.g., *Fujikawa v. Wattanasin*, 93 F.3d 1559, 1571, 39 USPQ2d 1895, 1905 (Fed. Cir. 1996) (a "laundry list" disclosure of every possible moiety does not constitute a written description of every species in a genus because it would not "reasonably lead" those

Art Unit: 1614

skilled in the art to any particular species); In re Ruschig, 379 F.2d 990, 995, 154 USPQ 118, 123 (CCPA 1967).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 19 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim recites " R is a heteroaryl containing nitrogen as heteroatom bound to the rest of the molecule via all the positions allowed" this is indefinite. Where is the position of attachment, are all valencies accounted for and if indeed attachable at any position. Because if the valencies are accounted for there is no way the heteroaryl can attach to any position.

Double Patenting

Claims 16-22 and 24-35 remain provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over the pertinent claims of copending Applications Nos.10/501,135.

Applicant's request that the Double Patenting rejection be held in abeyance until it is made permanent is noted but will be maintained in this Office Action and future Office Actions until withdrawn. Applicants, have not presented a terminal disclaimer and the claims of the above co-pending rejection remain pending, since this is not the only or sole rejection remaining the rejection is properly maintained.

No claim is allowed.
